CHIANG XIANG ZHI

SOFTWARE ENGINEER — BSC (HONS) GRADUATE

+60 18-2758288

xiangzhichiang@gmail.com

PROFILE

Full-stack Software Engineer and recent Asia Pacific University graduate specializing in Flutter, Python/FastAPI, ASP.NET Core, and AWS. Proven track record driving projects from architecture to deployment, including leading a cloud team and building UniLink, a production-ready marketplace with AI semantic search and payment integrations. Seeking a full-time role to build scalable, real-world products.

EXPERIENCE

Software IT internship - IJM
28 July - 14 November 2025

- Digitized manual company workflows by developing and deploying custom internal web and mobile applications using Flutter

Digital Marketer Intern - Cereals Project (Shopee Malaysia Store)
June - September 2023

- Optimized Shopee product listings and created digital marketing content while supporting and tracking the performance of online sales campaigns

Event Crew / Promoter (Part-time)
2022 - 2026

- Sime Darby, Guardian, IME, Sunway Pyramid, Astro, and other brand activations

EDUCATION

BSc (Hons) in Software Engineering
Asia Pacific University of Innovation & Technology (APU)
CGPA 3.42 - Second Upper

STPM - Kolej T6 Puchong
SPM - SMK PBP (1)

COMMUNICATION

Chinese
Malay
English
Cantonese

Languages: C# , Java , Dart , Python , Javascript , HTML , CSS , C++ , R , SQL

Framework: ASP.NET Core , Flutter , Next.js , Node.js , React , FastAPI , WinForms , Tailwind

Data & Cloud: PostgreSQL , Microsoft SQL server , SQL Lite , MySQL , Firebase , Supabase, NeonDB , AWS, Docker

Tooling: Git , Github , Visual Studio , Android Studio , VS Code, NetBeans, PyCharm , Vercel , Railway, Pinecone , LangChain (RAG) , Cursor , Antigravity , Codex , Claude Code

ACHIEVEMENTS

- Joget NextGenHack 2024 — Top 10 shortlisted, low-code/no-code enterprise solutions challenge, APU (Dec 2024)
- HackMY IoT 2026 Hackathon — Track 2, Industrial & Asset IoT ("Next-Gen Parking"), Monash University (Sep 2026)
- OperationClub APU — Committee member, Operations Department; Member, Chinese Club (Dec 2023 - Feb 2025)
- International Kangaroo Math Competition — Honorable Mention (2020)
- Safe Internet & Cybercrime Awareness Certificate — Digi Yellow Heart

KEY PROJECT

UniLink - Final Year Project - 2026

Flutter · Python/FastAPI · Supabase (PostgreSQL) · Pinecone · LangChain · Gemini · Stripe Connect

- Designed and built a cross-platform peer-to-peer campus marketplace and rental app with RAG-based semantic search (LangChain, Pinecone, Gemini)
- Engineered a secure, QR-based TOTP escrow payment system via the Stripe Connect API

Property Management Portal — Cloud Computing Team Project (Team Lead) - 2026

C# · ASP.NET Core MVC (.NET 8) · AWS (RDS, Lambda, API Gateway, S3) · PostgreSQL

- Led development of an ASP.NET Core property portal with Stripe, AI reporting, and AWS serverless deployment (Lambda, S3, Elastic Beanstalk)

KitaHack (National Hackathon) - GAPMAP - 2026

- Built a project targeting UN Sustainable Development Goals using Google Cloud technologies for KitaHack 2026

HackMY IoT Hackathon - 2026

Javascript/HTML/CSS & Python/FastAPI

- Tack 2 - Industrial & Asset IoT, "Next-Gen Parking" entry for HackMY's Industrial & Asset IoT track at Monash University Malaysia

Distributed Computing System - May 2026

Java - RMI

- Designed a distributed HR management system using a Java RMI client-server architecture with automation

Electric Vehicle Data Analysis - Dec 2025

JavaScript/HTML/CSS

- Analyzed a 3,000+ record EV dataset, performing six data operations in Functional Programming JavaScript

ACADEMIC PROJECT

Tuition Centre Management System - Sep 2023 - Feb 2024

Python

- Menu-driven system with role-based access (Admin, Receptionist, Tutor, Student) for students, classes, and payments

Restaurant Management System - March - Jun 2024

C# - WinForms - LocalDB

- OOP-based app for order, menu, and billing management

Order Tracking System (POTS) - Sep - Dec 2024

Java - OOP

- Procurement order tracking system applying OOP principles

E-Commerce Behaviour Analysis / Esports Championship Management System - Mar - May 2025

C++

- Two C++ applications: an e-commerce transaction/review analyzer using arrays, linked lists, and search/sort algorithms, and an esports match-result and player-stats tracker with custom data structures.

Secondhand Marketplace Mobile App - Mar - May 2025

Flutter - Firebase

- Marketplace app connecting admins, buyers, and sellers; designed, tested, and documented based on user research
