PROFILE

A committed and driven Software Engineering student with a strong foundation in programming, problem-solving, and software development methodologies. Highly responsible, well-organized, and passionate about technology. Actively seeking an internship to apply my technical expertise and programming skills to contribute to the organization's growth while gaining valuable industry experience.

PROJECT

● RESTAURANT MANAGEMNET SYSTEM - C#

March - June 2024

- Developed a C# WinForms restaurant management app with OOP and LocalDB for order, menu, and billing management.

● ORDER TRACKING SYSTEM - JAVA

September - December 2024

- Developed a Java-based Procurement Order Tracking System (POTS) using Object-Oriented Programming (OOP) principles.

● DATA ANALYTICS PROJECT - R program

September - December 2024

- Developed an R script to analyze a dataset by performing data preprocessing, exploratory data analysis, hypothesis testing, and visualization.

● SECONDHAND MARKETPLACE MOBILE APP - FLUTTER - FIREBASE

March - May 2025

- Developed a Flutter-based secondhand marketplace app to connect admin, buyers and sellers.
- Designed, tested, and documented the app based on user research and usability principles.

● TUITION CENTRE MANAGEMENT SYSTEM - PYTHON

September 2023 - February 2024

- Developed a menu-driven system for managing students, tutors, classes & payments
- Implemented role-based access (Admin, Receptionist, Tutor, Student)
- Stored and processed data using text files and modular programming

● E-Commerce Customer Behaviour Analysis System

March - May 2025

- Built a C++ program to analyze e-commerce transactions and reviews using arrays and linked lists.
- Applied search and sort algorithms to extract purchase behavior and review insights.

● Asia Pacific University Esports Championship Management System - C++

March - May 2025

- Developed Game Result Logging & Performance History module in C++
- Implemented custom data structures for efficient match result & player stats management

EDUCATION

BSc (Hons) in Software Engineering

Asia Pacific University of Innovation & Technology (APU)

GPA 3.3

Sijil Tinggi Persekolahan Malaysia

Kolej Tingkatan Enam Puchong

Sijil Pelajaran Malaysia

Sekolah Menengah Kebangsaan Pusat Bandar Puchong 1

LANGUAGE

Chinese 

Malay 

English 

Cantonese 

SKILLS

Java 

C# 

Python 

C++ 

Dart-flutter 

R programming 

MicrosoftSQL 

Git/Github 

Software Testing 

Agile & Scrum Development 

Problem Solving 

Communication 

Team Collaboration 

EXPERIENCE

Digital Marketer Intern

Cereals Project (Shopee Malaysia Store)
June - September 2023

- Managed Shopee product listings and optimized store content. Created marketing and social media content
- Supported online sales campaigns and basic performance tracking.

Event Crew / Promoter (Part-time)

Sime Darby/Guardian/IME/Sunway Pyramid/
Astro/ETC

2022 - 2025

- Assisted in event setup, registration, and logistics support.
- Promoted products and engaged with customers at various brand events. Provided product demonstrations and handled customer inquiries and have good communication.
- Collaborated with event teams to ensure smooth event operations.

ACHIEVEMENTS

Asia Pacific University of Innovation & Technology

Joget NextGenHack 2024

December 2024

Top 10 shortlisted candidates

- A Thrilling Showcase of Innovation - lowcode/nocode
- Create sustainable and scalable enterprise solutions

OperationClub APU

December 2023 - February 2025

Committee of Operation Department & Member of Chinese Club

- Contributing actively to the events, such as organizing and planning the events, to ensure smooth operation.

Sekolah Menengah Kebangsaan Pusat Bandar Puchong 1

INTERNATIONAL KANGAROO MATH COMPETITION -
August 2020 - Award of Honorable Mention

Safe Internet & Cybercrime Awareness Certificate -
Digi Yellow Heart, Bukit Kuning
